Tier II Basics

Facilities covered by The Emergency Planning and Community Right to Know Act (EPCRA) must submit an emergency and hazardous chemical inventory form to the LEPC, the SERC and the local fire department annually. Facilities provide either a Tier I or Tier II form. Most States require the Tier II form. Tier II forms require basic facility identification information, employee contact information for both emergencies and non-emergencies, and information about chemicals stored or used at the facility:

- The chemical name or the common name as indicated on the MSDS;
- An estimate of the maximum amount of the chemical present at any time during the preceding calendar year and the average daily amount;
- A brief description of the manner of storage of the chemical;
- The location of the chemical at the facility; and
- An indication of whether the owner of the facility elects to

withhold location information from disclosure to the public.

Some States have specific requirements in addition to the Federal Tier II requirements. To obtain the current Tier II reporting procedures in your State, please use State list below.

For more information about chemical inventory reporting under EPCRA you can view or download our [Factsheet: The Emergency Planning and Community Right-to-Know Act](#) (PDF) (March 2000)
