

The Chlorine Institute, Inc. &

TRANSCAER®

*Is your community
prepared for a
transportation hazardous
materials incident? Attend
a TransCAER® training
session to be sure you are!*

October 28, 2009

8am - 4pm

Training includes:
**Hands-on and Classroom
activities**

Topics Include:
**Chlorine, Hydrochloric Acid,
Sodium Hypochlorite, Sodium
Hydroxide, Railroad Safety/
Emergency Response and more!**

Complimentary lunch
Certificates upon completion

Being Held At the

Union Pacific Railroad - Memphis Yard

1021 Melrose Street, Memphis, Tennessee

Stations

TransCAER®
Memphis, TN

Chlorine Safety Presentation --- An industry representative will review the primary mission chemical of the Chlorine Institute - chlorine. The team will cover chlorine chemical and physical properties, manufacturing, and transportation.

Chlorine Workshop --- An industry team will provide hands-on training with a chlorine tank car, cylinders, ton containers and valves.

Caustic and Bleach --- A team will provide product and shipment information along with response actions for caustic soda and caustic potash (sodium and potassium hydroxides) and sodium hypochlorite (bleach). An exhibit of the package and bulk transportation containers along with emergency response equipment will give attendees an opportunity for hands-on training. The workshop will focus on hazards and identification, protective measures for emergency responders, emergency response equipment and methods.

Hydrochloric Acid --- A team will provide detailed product information and shipment and response actions for transporting hydrochloric acid. This program will include an outdoor exhibit of the bulk transportation equipment used for product shipment. Attendees will have the opportunity for hands-on training experience with this equipment.

Railroad Safety --- Attendees will be provided with a basic knowledge of the requirements for safe transportation of hazardous materials by rail. Participants will gain hands-on experience with the various tank car fittings arrangements common throughout the chemical industry.

Emergency Kits A & B for Chlorine Cylinders and Ton Containers --- Chlorine Institute CHLOREP Emergency Response Teams will provide instruction on chlorine cylinders and ton containers, the chlorine Emergency Kits A and B and the use of these tools in response to chlorine container leaks. Participants will get an opportunity to gain hands-on practical experience in the application of the emergency kits. Participants should bring their own hard hats, gloves, safety glasses, and steel-toed shoes.

Emergency Kit C & Midland Kit - Chlorine Institute CHLOREP Emergency Response Teams will provide instruction in the use of the chlorine Emergency Kit C and its use in the response to chlorine tank car and cargo tank valve leaks. Participants will get an opportunity to gain hands-on practical experience in the application of the Emergency Kit C. Participants should bring their own hard hats, gloves, safety glasses, and steel-toed shoes.

Railroad Emergency Response – A session detailing the primary elements of how local emergency responders can best cope with a rail emergency. Safety is the basis of the course beginning with communication with the railroad. What are and how to use the toll free emergency telephone numbers, establishing site safety and size up or assessment of the incident. What to expect from and how to work with the railroad emergency response team. Basic elements of hazmat recognition are also emphasized.
